Estimate members from the IAPT Research Grants Program in Plant Systematics,

In relation to the presentation of Juliana Schaefer I must say that it would be really important for her PhD project to be able to perform the field trips to Paraguay, Uruguay and within Brazil that she is planning.

Juliana Schaefer is an excellent student that has been working in Verbenaceae since 2016, and has really shown good skills as a biologist as well as a very pleasant disposition to work.

As a consequence, the achievement of this IAPT grant would be a great step towards her growing performance as a botanist.

As one of her PhD supervisors I fully recommend her application,

Sincerely,

Nataly O'Leary
